PROFESSIONAL SUMMERY

Hardworking and enthusiastic fourth year B.E. student who loves to learn and expand my knowledge horizons. Known for a strong work ethic and proactive approach to challenges.

PROJECTS

Hotel Management System

- A desktop application to help hotels manage their operations and customer bookings
- Built using Python with Tkinter for the interface and MySQL for storing data
- Solves the real problem of manually tracking room availability, customer records, and generating reports which is time-consuming and error-prone for hotel staff

SummarEaze

- A tool that creates summaries of YouTube videos and can record live transcripts
- Built using Python and integrates with YouTube's platform
- Solves the problem of spending too much time watching long educational videos by providing quick summaries and transcripts for students and learners to study efficiently

CodeQuest

- It is an RPG-style game and learning platform to make learning coding fun and interactive.
 - This game was using Kaboom.js and the website with React, with MongoDB for managing user data.
 - I designed the game interface and developed the core game systems, focusing on gameplay and functionality.
-

SKILLS

- Technology stack:
Python, JavaScript, SQL, MySQL HTML, CSS, Git
 - Quick learner.
 - Ability to work in a team.
 - Time management.
-

ACHIEVEMENTS

- Presented a paper titled "Leveraging Artificial Intelligence for Education Enhancement" at ICSTEMSD 2024.
 - Participated in various hackathons.
-
